

# Respecting Open Source Licenses !

## OSCAD ( & OSLiC )

The **Open Source Compliance Advisor** (and its mother)

(a) Free Tool(s) to Facilitate the Fulfillment of Open Source Licenses

Open Source CompLianCe in Deutsche Telekom

*Karsten Reincke*

Erleben, was verbindet.

[Nature of Open Source](#)[OS as Instance](#)[Challenge of Companies](#)[OS @ Telekom](#)[The arguing OSLiC](#)[The supporting OSCAd](#)[Summary](#)**R<sub>O</sub>S<sub>L</sub>!****Open Source thinks the other way round:**

You ever have to know, what you have to do!

## “PAYING” BY DOING

(c) K. Reincke, Deutsche Telekom AG

2013-12-05

2

- We all know: We can't buy the right to use open source software. The open source software thinks the other way round: you get the right to use, to modify and/or to redistribute the software by doing what is required by the open source licenses. Thus, the management of companies using open source software has to know: open source software follows the principle ‚paying‘ by doing.

[Nature of Open Source](#)[OS as Instance](#)[Challenge of Companies](#)[OS @ Telekom](#)[The arguing OSLiC](#)[The supporting OSCAd](#)[Summary](#)

# R<sup>OSL!</sup>

Open Source thinks **the other way round:**

You ever have to know, what you have to do!

## “Free Redistribution

The license shall not restrict any party from selling or giving away the software as a component of an aggregate software distribution containing programs from several different sources. **The license shall not require a royalty or other fee for such sale.”**

*§1 of the Open Source Definition\**

© K. Reincke, Deutsche Telekom AG

2013-12-05

3

- This statement refers to the OSD the „Open Source Definition“ hosted and maintained by the Open Source Initiative. The first paragraph of the OSD forbids to request for a license fee. Hence, we can't buy any open source software..

Nature of Open Source    OSI as Instance    Challenge of Companies    OS @ Telekom    The arguing OSLiC    The supporting OSCAd    Summary

# R<sub>OSL!</sub>

Open Source thinks **the other way round:**  
You ever have to know, what you have to do!

1. Free Redistribution
2. Source Code
3. Derived Works
4. Integrity of The Author's Source Code
5. No Discrimination Against Persons or Groups
6. No Discrimination Against Fields of Endeavor
7. Distribution of License
8. License Must Not Be Specific to a Product
9. License Must Not Restrict Other Software
10. License Must Be Technology-Neutral

```

2013-12-05    4

(c) K. Reincke, Deutsche Telekom AG

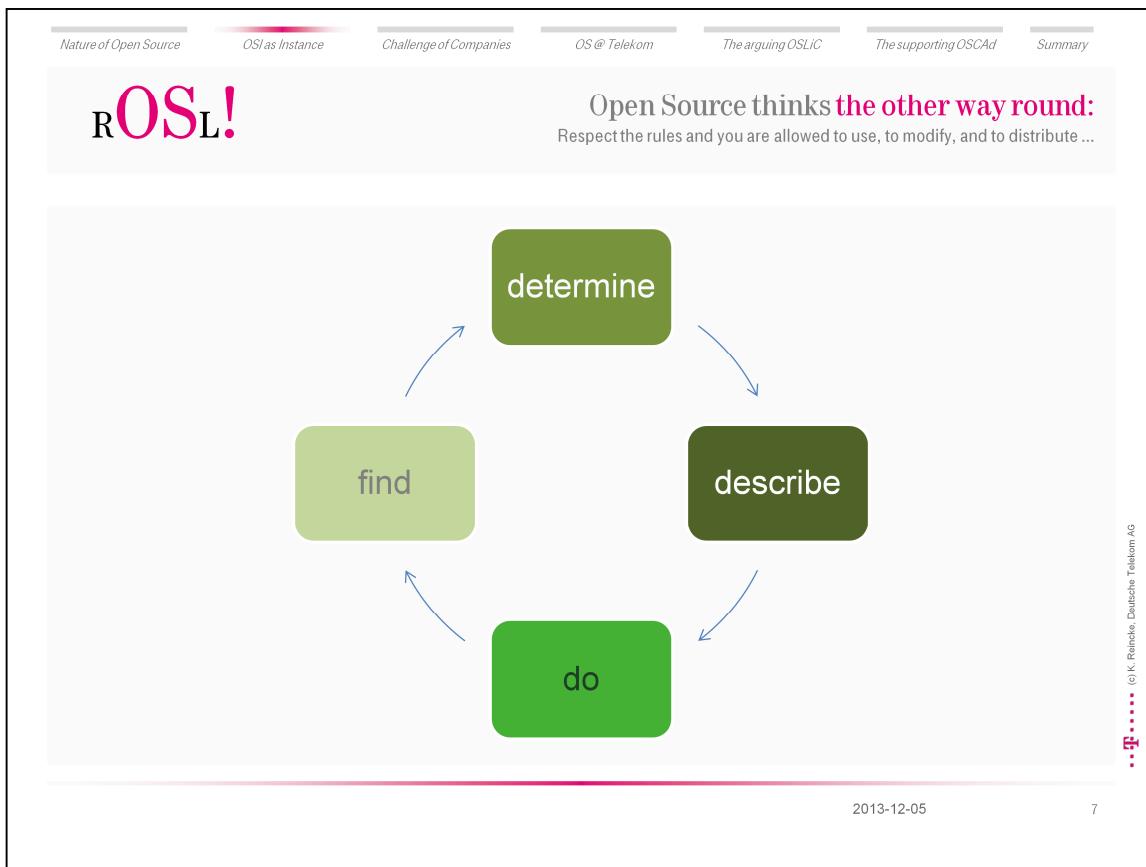

- The idea of the Open Source Definition is to separate Open Source Licenses from all the other software licenses not fulfilling these conditions.

- Organizationally, this separation is done by the OSI license review process. But again, inside of the set of OSI approved licenses, we can cluster these licenses by some of their features. One of the most known method to group the open source licenses internally is a taxonomy based on the categories ‘permissive licenses’, ‘weak copy left licenses’, and ‘strong copy left licenses’.

The infographic is titled "R0SL!" and features a navigation bar at the top with links: "Nature of Open Source", "OS as Instance", "Challenge of Companies", "OS @ Telekom", "The arguing OSLiC", "The supporting OSCAd", and "Summary". Below the title, it says "Open Source Initiative maintains the rules: You ever have to know, what you have to respect!". The main visual is a mathematical equation:  $69 \times > 5 = > 345$ . Each part of the equation is explained: "69" is "(with respect to 2012-05-11) OSI certified", "×" is "'use', 'modify', 'distribute', 'modify & distribute', 'embed' as", and "= > 345" is "more or less similar lists of required actions as". Below the equation, there are three sections: "Open Source Licenses", "Open Source Use Cases", and "Fulfilling Task Lists". A note at the bottom left says "\* <http://www.opensource.org/licenses/alphabetical>". The date "2013-12-05" and page number "6" are at the bottom right. A small "T" logo is on the far right edge.

- But then there exists specific challenge: There are so many open source licenses (69) which require different fulfilling activities. And these fulfilling working steps must consider the different contexts (>5): do I only use the software for myself. Or do I hand over it to any other person? And have I modified it? Hence we get more than 345 possible fulfilling task lists.

- So, a reliable open source license management process is determined by other aspects than the traditional license management:
  - find all used / received open source software
  - determine the usage context
  - describe the necessary actions which must be executed for fulfilling the license in this context
  - do what has to be done for acting according the open source license

Nature of Open Source    OS as Instance    Challenge of Companies    OS @ Telekom    The arguing OSLiC    The supporting OSCAd    Summary

# Rosl!

Open Source thinks **the other way round:**  
Respect the rules and you are already allowed to use, to modify, and to distribute the results!

## WHO SHALL DO THAT?

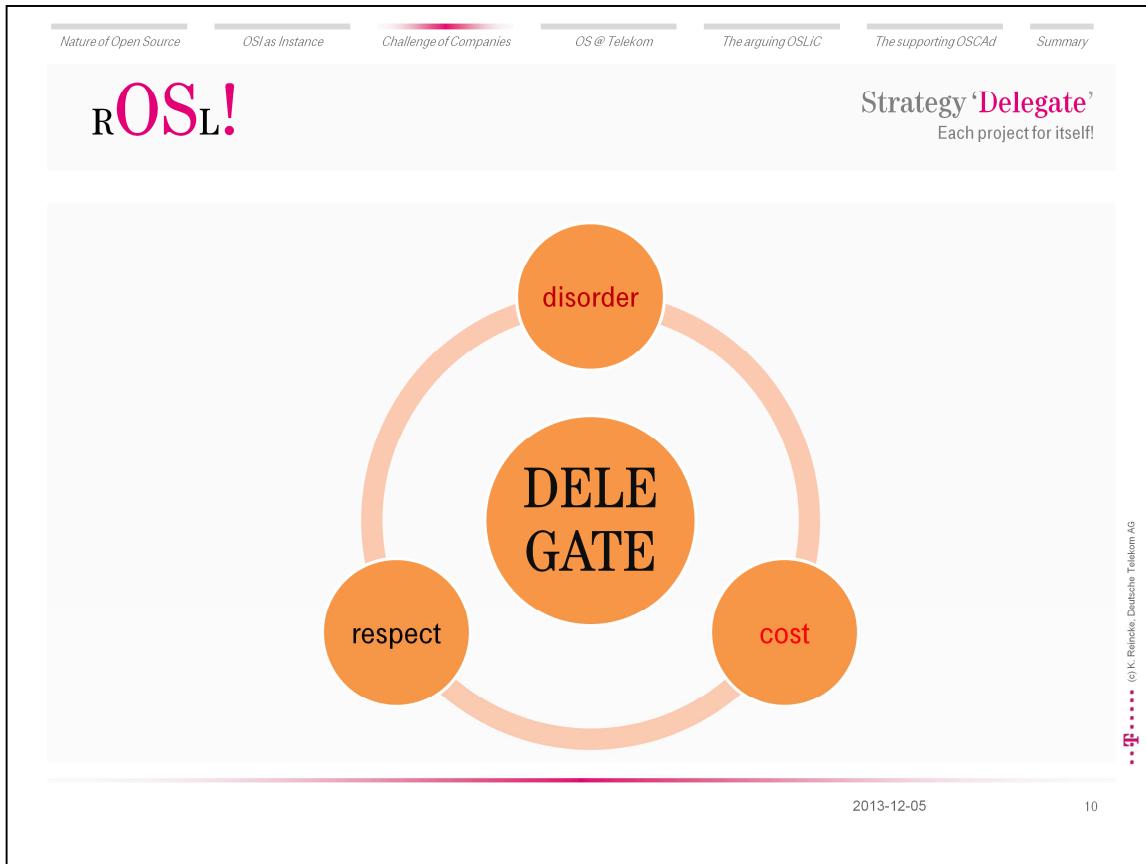

2013-12-05    8

(c) K. Reincke Deutsche Telekom AG

- So, the main question is: who shall execute this job of ensuring to act according the open source licenses?
- For large companies this concerns its charges: the larger the company, the more used open source software, the more work, the more cost
- There exist different strategies to solve this challenge:

- The first strategy is to hope that anyone will do the job, even if nobody explicitly requires that this job must be done.
- Of course, it is a bad strategy – namely for companies who love to act compliantly.

- The second strategy is to delegate the job to each (software) project of a company.
- It's a better strategy – but still very expensive: each project must get / train its own license expert.

Nature of Open Source    OSI as Instance    Challenge of Companies    OS @ Telekom    The arguing OSLiC    The supporting OSCAd    Summary

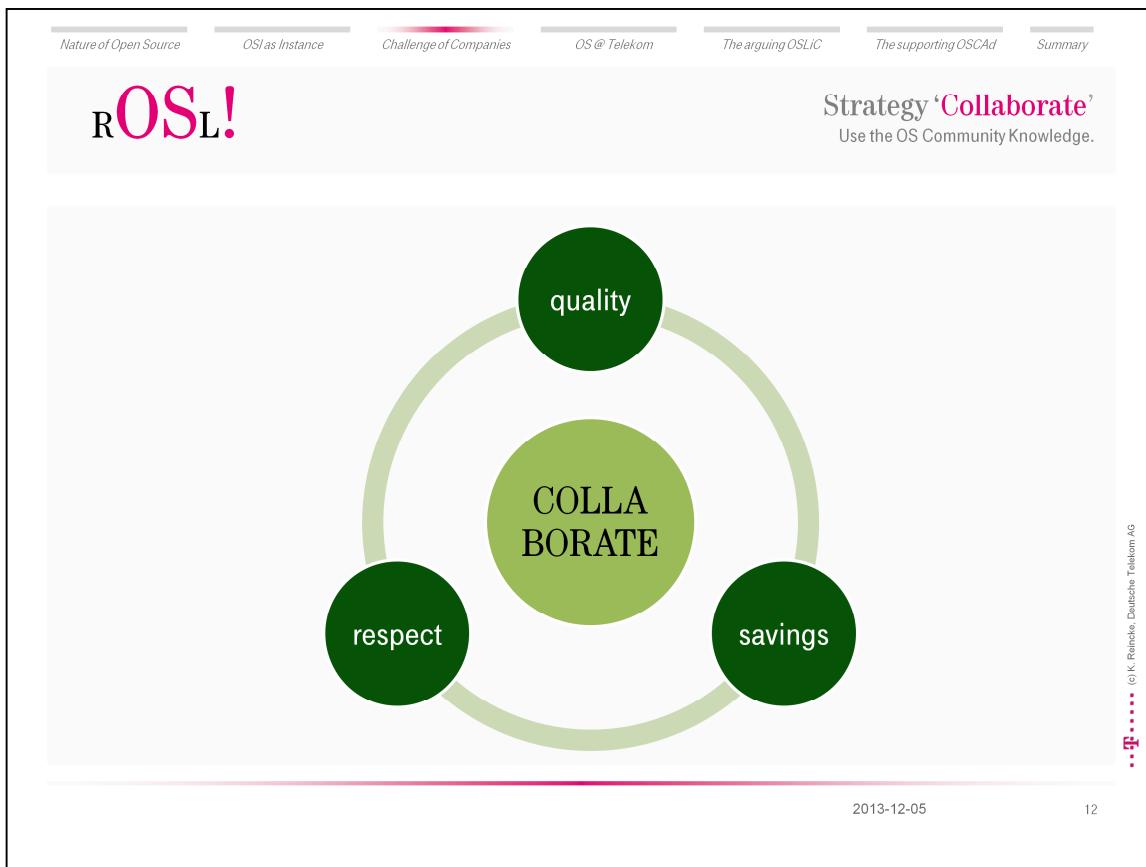

# R<sub>OSL!</sub>

Strategy ‘Centralize’  
One team of OS License Experts for all.

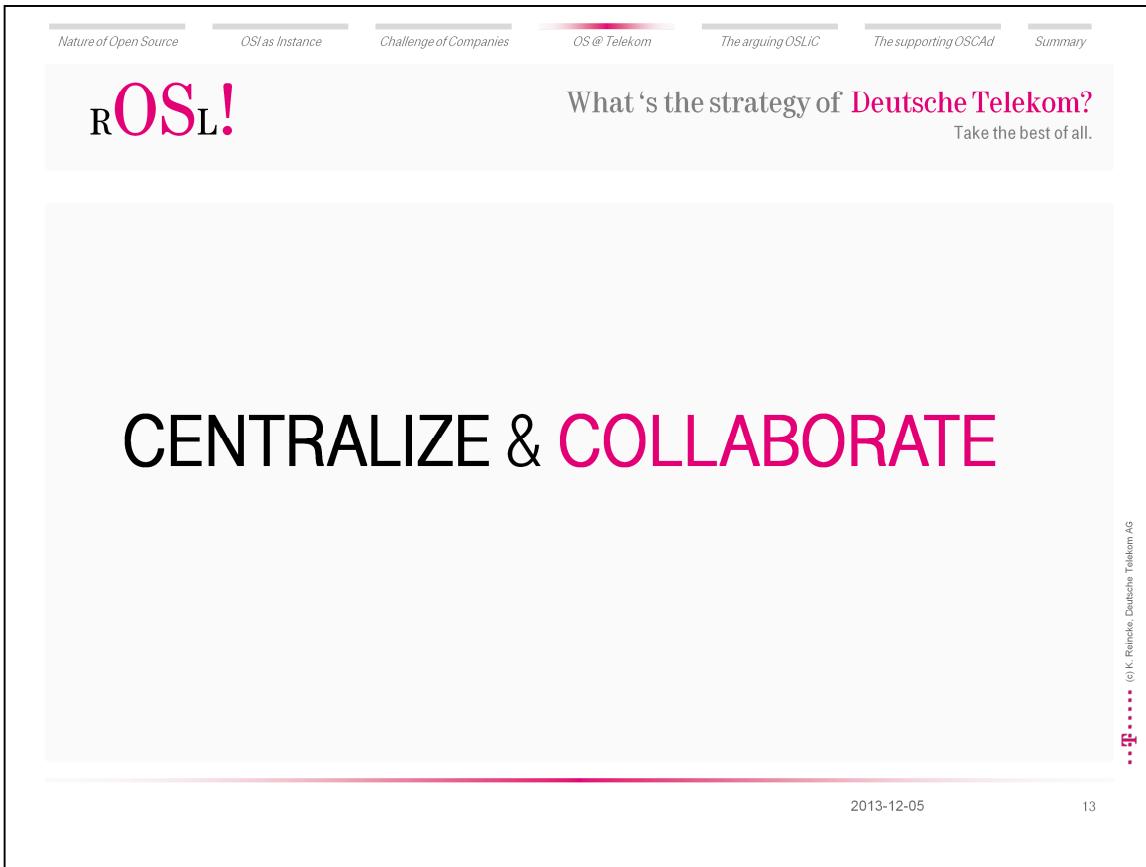

2013-12-05    11

© K. Reincke, Deutsche Telekom AG

- A good strategy is to form an internal central team of license experts which serve all request of all projects.

- The best strategy is to cooperate with the open source communities: the power is in the swarm

Nature of Open Source    OS as Instance    Challenge of Companies    OS @ Telekom    The arguing OSLiC    The supporting OSCAd    Summary

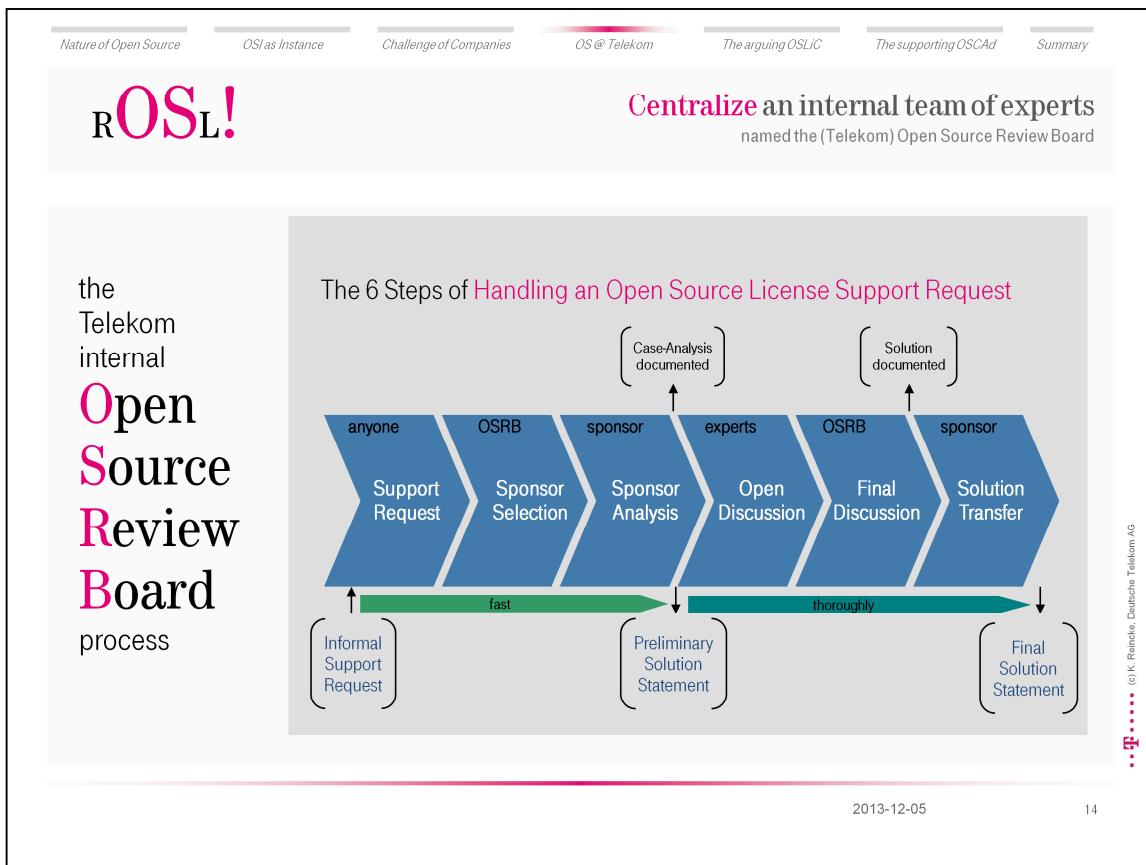

# R<sup>OSL!</sup>

What 's the strategy of **Deutsche Telekom?**  
Take the best of all.

# CENTRALIZE & COLLABORATE

2013-12-05    13    (c) K. Reincke, Deutsche Telekom AG

- The strategy of Deutsche Telekom AG?
- No doubt, we want to act according the open source licenses – even if we are a very large company.
- So we use a mixture of strategy no 3 (centralization) and no 4 (collaboration)

- Firstly we established indeed a team of experts, internally known as the Telekom Open Source Review Board, which acts according to this process: any one in the company can ask any one on the board a question. The board determines a sponsor for the request which firstly and very quickly analyzes and describes the case and gives a first preliminary solution statement. Then this statement is discussed and finally closed by the OSRB as whole.

Nature of Open Source    OSI as Instance    Challenge of Companies    OS @ Telekom    The arguing OSLiC    The supporting OSCAd    Summary

# R0SL!

**Centralize** and know that pareto will strike back!  
The same work must be repeated to often.

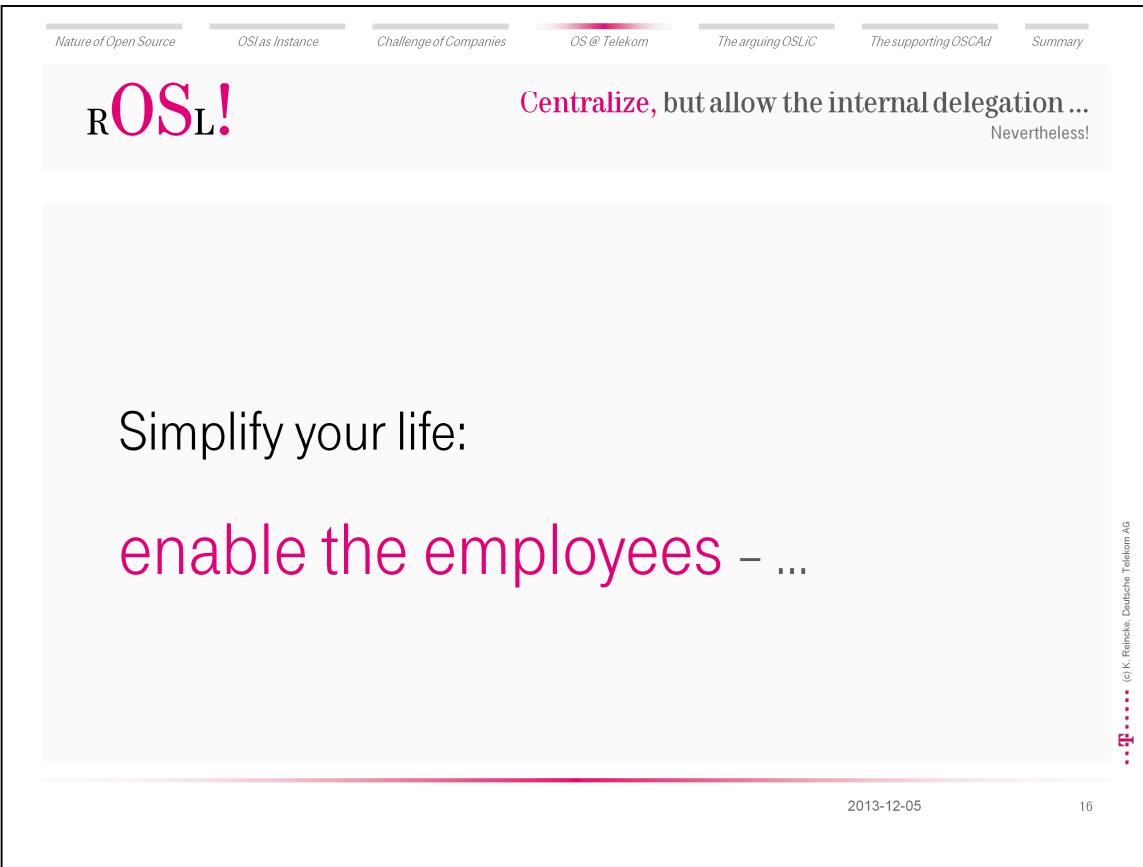

**80** % of the requests are manageable by

**20** % standard answers!

(c) K. Reincke Deutsche Telekom AG

2013-12-05    15

- But one has to know, that the simple cases repeat again and again and hence must be handled again and again

Nature of Open Source    OS as Instance    Challenge of Companies    OS @ Telekom    The arguing OSLiC    The supporting OSCAd    Summary

R<sup>OSL!</sup>

Centralize, but allow the internal delegation ...  
Nevertheless!

Simplify your life:  
**enable the employees – ...**

2013-12-05    16    (c) K. Reincke, Deutsche Telekom AG

- So: At latest, it is nevertheless better to enable the employees themselves to answer at least the simple questions

[Nature of Open Source](#)[OS as Instance](#)[Challenge of Companies](#)[OS @ Telekom](#)[The arguing OSLC](#)[The supporting OSCAd](#)[Summary](#)

# R<sup>OSL!</sup>

Centralize, but allow the internal delegation ...

if it's supported by a simple tool!

... but without being **disruptive**, without losing quality, and without generating extra cost:

(c) K. Reincke, Deutsche Telekom AG  
.....

2013-12-05

17

- ... but without being disruptive, losing quality, or generating extra cost:

# ROSL!

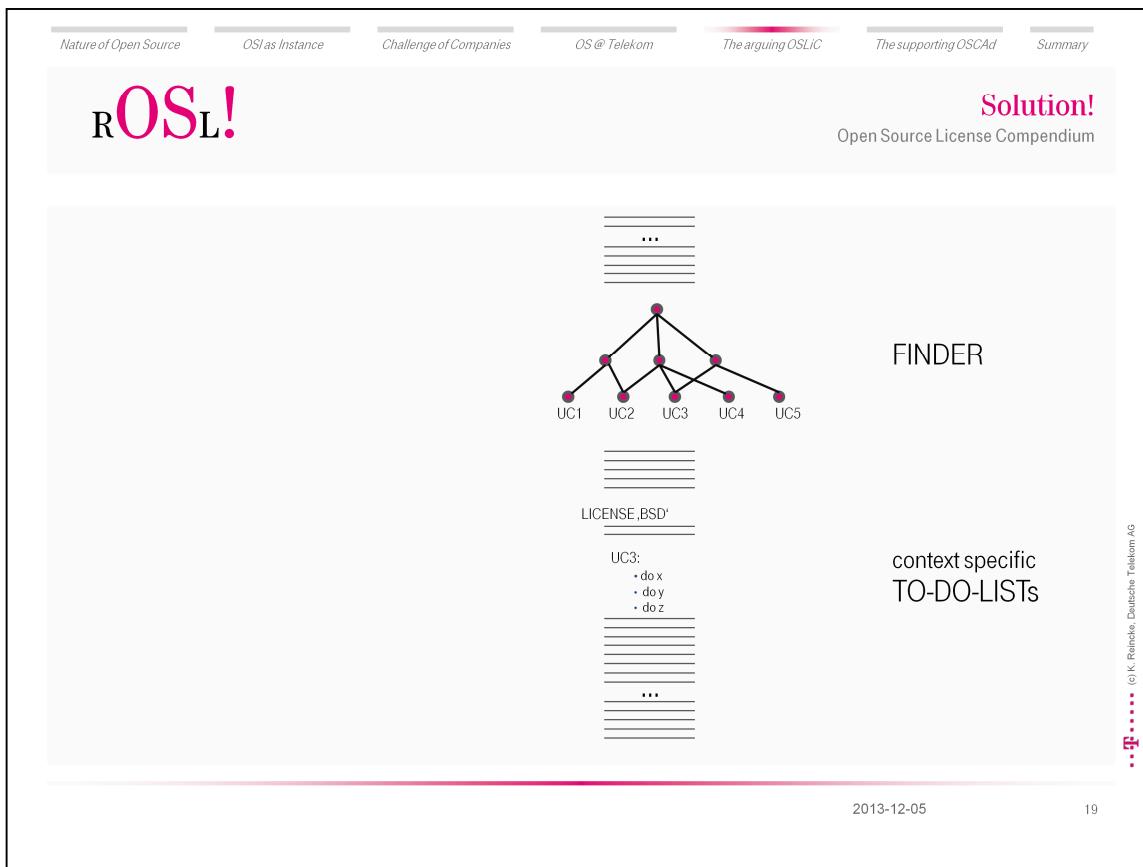

Solution?  
Open Source License Compendium

The only thing we need is an easily to use Open Source License Compendium

2013-12-05    18

(c) K. Reincke, Deutsche Telekom AG

- The solution would be an Open Source License Compendium ...

- Such a compendium will only be usable by developers if
  - a) they got a simply organized finder leading to the relevant use case
  - b) for each license and each use case the compendium offers a to-do-list by which the users can be sure to act according to the open source license.

Nature of Open Source    OSI as Instance    Challenge of Companies    OS @ Telekom    The arguing OSLiC    The supporting OSCAd    Summary

# ROSL!

Solution?  
Open Source License Compendium

Unfortunately such an Open Source License Compendium did not exist.

2013-12-05    20    (c) K. Reincke, Deutsche Telekom AG

- Unfortunately such an **Open Source License Compendium** did not exist. But fortunately - as often done in the community - anyone takes the task ...

Nature of Open Source      OSI as Instance      Challenge of Companies      OS @ Telekom      The arguing OSLiC      The supporting OSCAd      Summary

# R<sup>O</sup>S<sup>L</sup>!

Enable the internal **delegation**  
... of handling the standard cases ...

Telekom is writing an  
**Open Source License Compendium**

**Mission:** Support our developers to **use** Open Source Software compliantly – **as easy as possible**

**Motto:** Offer **one reliable way** for each license and each use case in a simple and easy to find manner

(c) K. Reincke, Deutsche Telekom AG

2013-12-05      21

- The first idea of DTAG to solve this issue is to write an Open Source License Compendium following
  - the mission: Support our developers to use Open Source Software compliantly – as easy as possible
  - the motto: Offer only one reliable way for each license and each use case in a simple and easy to find manner

Nature of Open Source      OSI as Instance      Challenge of Companies      OS @ Telekom      The arguing OSLiC      The supporting OSCAd      Summary

# R<sup>O</sup>S<sup>L</sup>!

But enable also the **external collaboration!**  
 The swarm always knows more than a small group of experts:

Telekom is giving it free: The  
**Open Source License Compendium**

- is commonly developable because of its LaTeX/BibTeX nature
- is publicly hosted as a GitHub project
  - Oslic Projectpage (on GitHub): <https://github.com/dtag-dbu/oslic>
  - Oslic Homepage (on GitHub): <http://dtag-dbu.github.com/oslic>
- is licensed under CC BY-SA 3.0 DE\*
  - <http://dtag-dbu.github.com/oslic/en/oslic/license.html>
- is open to be collaboratively developed together with the community

© K. Reincke, Deutsche Telekom AG

2013-12-05      22

- The second idea of DTAG is to publish this compendium under the Creative Commons License Share Alike – a license which might be viewed as GPL for documents.

Nature of Open Source      OS as Instance      Challenge of Companies      OS @ Telekom      The arguing OSLiC      The supporting OSCAd      Summary

# R<sup>OSL!</sup>!

Be invited, be welcome!  
We want to collaborate.

Telekom is giving it free: The  
**Open Source License Compendium**

? What  
– the hell –  
does all that mean **concretely** ?  
Demo or Die!

2013-12-05      23

Demo OSLiC.

The slide has a navigation bar at the top with tabs: Nature of Open Source, OSI as Instance, Challenge of Companies, OS @ Telekom, The arguing OSLiC, The supporting OSCAd, and Summary. A large title 'R<sup>O</sup>SL!' is on the left. On the right, it says 'Feedback? ... on the way'. In the center, there's a logo for 'OS / LiC' and text for the 'FSFE European Legal & Licensing Workshop 2013, Amsterdam'. Five speech bubbles contain the following text: 'enormously helpful', 'great work', 'very informative', 'need's an interactive interface', and 'so daunting'. A vertical copyright notice '(c) K. Reincke Deutsche Telekom AG' is on the far right.

Nature of Open Source    OSI as Instance    Challenge of Companies    OS @ Telekom    The arguing OSLiC    The supporting OSCAd    Summary

# R<sup>O</sup>SL!

Feedback?  
... on the way

enormously helpful

great work

very informative

need's an interactive interface

so daunting

FSFE European Legal & Licensing Workshop 2013, Amsterdam

OS / LiC

2013-12-05    24

(c) K. Reincke Deutsche Telekom AG

- The feedback was a split vote:
  - Big encouragement, many thanks – especially of larger companies, and great admiration for having structured this topic successfully.
  - But also the message, that the OSLiC is daunting, that it won't be used by the intended readers, and that it should exist an interactive version.

Nature of Open Source      OSI as Instance      Challenge of Companies      OS @ Telekom      The arguing OSLiC      The supporting OSCAd      Summary

# R<sub>O</sub>S<sub>L</sub>!

**Collaborating with the community means Listening**  
... to the feedback:

The interactive version of the OSLiC, the  
**Open Source Compliance Advisor**

- is **commonly developable**: a php web application
- is **publicly hosted** as a GitHub project
  - OSCAd Projectpage (on GitHub): <https://github.com/dtag-dbu/oscad>
  - Oslic Homepage (on GitHub): <http://dtag-dbu.github.com/oscad>
- is **licensed under AGPL**
  - <http://dtag-dbu.github.com/oscad/en/oscad/license.html>
- is open to **be collaboratively developed together with the community**

(c) K. Reincke, Deutsche Telekom AG

2013-12-05      25

- The third idea of DTAG is to republish this compendium as interactive web application, licensed under the AGPL, and also hosted on github, but with its own name: „the Open Source Compliance Advisor“..

We want to collaborate.

## State of the OSLiC & OSCAd

**ready for using:**

- use case based **task lists** for Apache, BSD, MIT, MS-PL, PgL, PHP EPL, EUPL, LGPL 2.1/3.0, MPL, GPL 2.0/3.0
- use case based **finder**
- description of the protecting power
- corresponding **license taxonomy**
- **exposition** of the patent clauses

**still open:**

- task lists for AGPL, CDDL, MS-RL, ...
- derivative work exposition
- license compatibility discussion
- OS and money chapter

(c) K. Reincke, Deutsche Telekom AG

## Futere of the OSLiC & OSCAd

**Cooperating Community:**

- the KOREAN translation of the OSLiC
- the integretation of other licenses into OSLiC
- the python reimplementaion of the OSCAd

© K. Reincke, Deutsche Telekom AG

2013-12-05    28

The future of the OSLiC and the OSCAd is the already cooperating community:

- The Korean translation of the OSLiC can also be regarded as a prominent example,
- as the OSLiC maintenance, executed by Deutsche Telekom AG, a well known European telecommunication company or
- as the just started re-implementation of the OSCAd by the company Amadeus, the leading provider of IT solutions to your tourism and travel industry

\* valid until OSCAd will have found its durable host    2013-12-05    29

- So, for summarizing the result:
- We, DTAG, need a supporting tool for acting according to the Open Source licenses - but without investing too much manpower.
- First, we set up the internal Telekom Open Source Review Board
- Second, we are going to reduce the work of our OSRB by writing a simple to use compendium covering to-do-lists for the standard case.
- Third – as a giving back to the community (and as process of a public review) – we've published this compendium in the spirit of open source
- Fourth, we listen to the feedback and published also a free interactive version of the OSLiC, the Open Source License Advisor OSCAD
